Tsotsis, T.T., 221

Ward, T.L., 165
Way, J.D., 265
Wu, J.C.S., 85

Xu, W.-C., 245

Ziaka, Z.D., 221

Subject Index Volume 77 (1993)

blends, 49

cake filtration, 113
cake formation, 113
carbon dioxide decomposition, 245
carrier mediated diffusion, 59
catalysis, 137
catalyst deactivation, 207
catalytic membranes, 233
cell culture feed, 1
ceramic membranes, 265
chemical equilibrium, 245
chromia–alumina catalyst, 207
compaction, 123
composite membranes, 181
concentration polarization, 23
controlled release, 99
co-polymers, 49

dehydrogenation, 197
diffusion, 221
drug permeability, 99

electrically controlled permeability, 99
electroless codeposition, 181
ethylbenzene dehydrogenation, 233

facilitated transport, 59
fouling, 113

gas and vapor permeation, 69
gas permeation, 85
gas separations, 265

hollow fibers, 123
hybrid systems, 221

inorganic membranes, 265
interface resistance, 69
intrasegmental mobility, 41
isobutane dehydrogenation, 207

liquid crystalline polymers, 99
liquid permeability and separations, 1, 23

mathematical model, 233
mathematical modeling, 85
membrane enclosed catalytic reactor, 197
membrane preparation and structure, 181
membrane reactor, 207, 233, 265
metal membranes, 255
microporous and porous membranes, 137, 265
microporous membranes, 165
mixed gases, 49
modeling, 197

operating pressure, 123

particulate suspension feed, 23
Pd–Ag alloys, 181
permeability, 165
permeation, 197
pervaporation, 69
plasticization, 49
polyimide isomers, 41
pore size distribution, 23
process, 137
propane dehydrogenation, 221

rotary vortex filter, 1, 23
rotating annular filter, 1

silica-based membranes, 165
silica membranes, 207
sol–gel, 137
sol-gel process, 165

theory, 69
time lags, 41
transverse compression, 123

viscoelastic behavior, 123
